

BARGUNS

Bar guns are small computers and as such they must be programmed to collect bar code information in the users format. This programing is normally obtained from a value added retailer who sells the gun and programs it to collect the required information. Any Bar Gun/Hand Held Computer that can produce a file in the following Ansi II format can be imported into APPMS.

IBISDATA (File Name)(NOTE NO EXTENTION)

004H9105012127 PULA * (Header Record)

004T00019W00020W00025W00024W* (Bar Code Record)

Explanation of Header Record:

	1	2	3	4
5	6	7	8	
1234567890	1234567890	1234567890	1234567890	1234567890
1234567890	1234567890	1234567890		
004H9105012127	PULA	*		

POSITION 1-3 = Hand receipt account number
POSITION 4 = H for hand receipt
POSITION 5-6 = 2 Digit Calendar Year
POSITION 7-8 = 2 Digit Month
POSITION 9-10 = 2 Digit Day of Month
POSITION 11-15 = 5 Digit Room

Current Scanners that use the above files for
barcode reconciliation are listed
below:

PTC-701 TELXON Hand held computer with
Symbol Laser scanner.
(old BARCIS Scanner)
Internal EPROM was provided with units
from TELXON.

VIDEX TIMEWAND II Hand held computer and
scanner.
Internal program is available from: Intelec
Systems Corp
10201 W. Markham, Ste. 208
Little Rock, AR 72205-2181
Phone (501) 221-3600
Fax (501) 221-7412

PSION Organizer II with wand scanner.
Internal program is available within the
APPMS program.
Contact CELD-MS for instruction booklet
and copy of CL program from PSION.

PTC-710 and above series are replacements
for the PTC-701.
This unit can be used but you must
contact the TELXON Value Retailer who
sales the hand held computer and have
them convert the EPROM from the old
PTC-701. The SYMBOL Laser scanners used
with the PTC-701 when coupled with
a power pack can be used with the new
PTC-710.
